

## Pareisse Wilson

Pareisse says she was nominated to be in the Disability Power 100 by a lady called Jenny. Pareisse was surprised and pleased by this.

Pareisse is pleased to hear that there will be a **STEM** category in the Disability Power 100 in 2022, as she works in this area.

**STEM** stands for science, technology, engineering and mathematics.

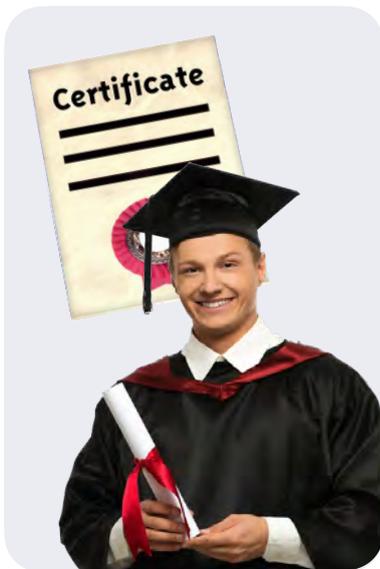

Pareisse helps businesses to make sure their websites and buildings are **accessible** to disabled people.

**Accessible** means when something is easy to use and suitable for people with different needs.

Pareisse thinks that young people with disabilities should:

- be seen as people, not as their disabilities.
- keep trying to achieve what they want to in life.
- tell other people what their life is like, so that things can change for the better.

Pareisse achieved some **qualifications** in 2021 and hopes to get more in 2022.

**Qualifications** are tests or courses you have passed. If you have qualifications you have more chance of getting a job. Employers know you are good at what you do.

Pareisse wants to continue her work to make sure that disabled people are always included when companies think about the design of their websites and buildings.
