Disability Power 100

## Heidi Carter

Heidi is passionate about all disabled people having access to better health care and independent living.

Since 2016 Heidi has been part of a project called 'Don't Screen Us Out'.

'Don't Screen Us Out' works to get rid of a law which says a woman can **abort** a baby with disabilities up until they are about to be born.

**Abort** means to get rid of a baby while it is still in the mum's stomach.

Heidi is the first person with Down's Syndrome to take the Government to court over this issue.

Heidi has also written a book called 'I'm Just Heidi' which is all about her life.
