

## Suzie Miller

Suzi works at Microsoft as a Senior Cloud Solutions Architect. This means she helps people to store their computer documents online.

She has worked with computers for over 20 years.

She works to make computers, phones and the internet more accessible to disabled people.

Suzie is **neurodiverse** and has 2 other syndromes which mean that she can't move around easily.

**Neurodiverse** means your brain doesn't work in the same way as other people.

Before working with Microsoft, Suzie worked at Amazon and set up a group for disabled people. The group helped people at Amazon understand more about disabled people.
